VECTORMAN!

The future of the human race looks hopeless when maintenance drones accidentally replace the orbot leader's head with a salvaged atomic bomb. All the orbots on Earth are immediately ordered, via television receivers, to stop cleaning up the planet and to start manufacturing weapons for an impending ambush of the returning humans. Only one orbot, a sludge barge pilot who was out of communications range, is unaffected by the evil takeover. You are that pilot: VectorMan! The only hope of the entire human race is for you to destroy the villainous WarHead: you must seek him out by following a trail of television receivers around the Earth, and then confront him in a battle that will decide the fate of humanity, and of the planet Earth itself!

OPTIONS

- D-Pad Up: Move Cursor Up
- D-Pad Down: Move Cursor Down
- D-Pad Left: Change Selection
- D-Pad Right: Change Selection
- Start: Exit to Title Screen
- A, B, C: * Trigger Sound Test
 - * Trigger Music Test
 - * Information Screen

From the Title screen, you can Select OPTIONS to configure the game.

SOUND: Turn sound effects on and off. Do this if you can't take the excitement of loud explosions.

MUSIC: Turn game tunes on and off. This is useful if you have lame taste in music.

DIFFICULTY: Pick the one you can deal with: LAME (it's hard enough for most people), WICKED (you won't survive), and INSANE (no one comes out alive).

MUSIC TEST: Listen to all the cool tunes. Hey, it even works when MUSIC is disabled.

SOUND TEST: Hear orbots die in agony! Thrill to VectorMan's voice! Try to figure out what #25 is!

BUTTONS: If you prefer a different button set-up, you can change it here.

INFORMATION: Trigger this option to take a gander at all the goodies in the game.

STATUS AREA

VectorMan's vital statistics are shown at the bottom of the screen at all times during gameplay:

Current Weapon: VectorMan can use six different weapons (see Weapons) throughout the game. This icon shows which weapon is currently active. It flashes when there is only a little ammunition left.

Lives: The dancing VectorMen icons show how many lives are held in reserve.

Health: VectorMan can take several hits before he loses a life. The filled-in balls represent the number of hits he can take. The empty balls represent the number of times he's been hit. Empty balls can be filled in by grabbing a health point power-up. The total number of health points can be increased by grabbing a Max Health power-up. See the section on Power-Ups for more info.

Time Remaining:

VectorMan has a limited amount of time to finish each level. This indicator shows how much time is left.

Multiplier:

By picking up power-ups, VectorMan can have a 2x, 3x, 5x, or even 10x multiplier. Each score earned while a multiplier is showing is multiplied by that number. Also, each health power-up you get fills in 2, 3, 5, or 10 health balls, and each 1-Up you get gives you that number of lives. Multipliers only last a short time, so rack up the points while you can.

Score:

You accumulate score by picking up photons (see Power-Ups) and by destroying enemy orbots. When you reach a certain score, you earn an extra life. The score needed depends on difficulty level (see Options):

Lame	10,000 Points
Wicked	20,000 Points
Insane	40,000 Points

POWER-UPS

The television receivers scattered throughout the Earth contain many different items that VectorMan can use in his fight against the evil orbots. Also, when enemies are destroyed, they occasionally drop an item that can be picked up.

x2

Multipliers:

x3

When VectorMan picks up a multiplier, all scores earned, health power-ups, and 1-Ups are multiplied by 2, 3, 5, or 10. 2x and 3x multipliers can appear when orbots are destroyed, but 5x and 10x multipliers can only be found in televisions. Multipliers only last a short time, so plan your strategy carefully.

x5

x10

Health Point:

A Health Point fills in a ball on the health indicator (see Status Area), up to the maximum number of health balls.

Full Health:

A Full Health power-up fills in all the balls on the health indicator.

Max Health:

A Max Health power-up increases the number of health points that VectorMan has. It can only be found in a television.

1-Up:

A 1-Up gives VectorMan an extra life.

Milestone

The milestone power-up enables VectorMan to restart the level wherever the milestone was touched.

Extra Time

Picking up the Extra Time icon adds two minutes to the level timer.

Television Receiver

Destroying a television earns VectorMan a PowerUp, Weapon, or Morph Icon.

Photon

Photons are pulsating energy sources that are spread out through all the levels. Picking up photons earns points.

WEAPONS

Weapon icons replace VectorMan's current weapon with a new one, but each new weapon has a limited amount of ammunition. When ammo is out, VectorMan gets the standard ball gun back.

Rapid Fire:

The rapid fire gun shoots a stream of bullets which ricochets off walls. Hold down the shoot button to repeatedly fire bullets.

Wave:

The wave gun fires a cone of energy. It's useful for destroying enemies who aren't in the direct line of sight, and it even goes through walls.

Bolo:

The bolo gun shoots a big rotating energy ball which travels through enemy orbots.

Orb:

The orb can only be used once each time you pick up an orb icon, but it destroys all the nearby orbots in a huge explosion.

Nucleus Shield:

The nucleus shield rotates around VectorMan, protecting him from harm. After a short period of time, the shield goes away automatically, leaving our hero with the standard ball gun.

MORPH ICONS

When VectorMan picks up a morph powerup, he immediately transforms into a new shape. Check out the Controls section of the manual to learn how to control the various shapes. Many times, when VectorMan is in a new shape, he has access to parts of the level that he wouldn't be able to reach in human form.

Drill: The drill is useful for breaking through floors.

Bomb: When the bomb detonates, floors, walls, and ceilings can be destroyed by the explosion.

Jet: As the jet, VectorMan can fly much higher than he could ever jump.

Fish: As the fish, VectorMan can swim through water much faster than he can run.

Missile: The missile form can break through ceilings.

Parachute: The 'chute makes VectorMan drift slowly down, so he has much more maneuverability than normal.

Buggy: VectorMan can use the Dune Buggy form as a battering ram to burst through walls.

BONUS ROUNDS

Satellite Dish

Destroying a satellite dish earns access to the Bonus Round, where VectorMan can rack up extra points. Satellite dishes are all protected by an impenetrable energy shield that can only be disabled by destroying the Satellite Shield Generator.

Satellite Shield Generator

Destroying the Shield Generator turns off the shield protecting the satellite dish. In most levels, the Generator is hidden in a secret place, so search the level carefully.

ENEMIES

TURRET

Turrets watch for intruders from vantage points on walls, floors or even on ceilings.

BEEDLE

Such a small orbot may seem harmless but in swarms Beedles are relentless!

DOORMAN

Doorman uses a sturdy shield to guard its territory. There aren't very many ways to push your way past. Maybe if you sneak up from behind...

HOWITZER

Howitzer is four barrels of grenade-launching mobile artillery.

JAWS

A fire extinguisher, a bear trap and some clever engineering make Jaws a lethal contraption. A quick blast from that nozzle and it's airborne!

LEGS

Legs is a sentry guarding its territory with a powerful kick!

MARGE

Marge is part Doorman, part Legs and all attitude. It'll seem docile until you get too close.

SLUDGE PILOT

An angry Sludge Pilot is a formidable foe. It shakes the ground and can blast you with powerful arm cannons!

ANGLER

Anglers usually swim in schools. So where you see one...

SUBMARINE

Packs of Submarine orbots patrol the seas. They'll sneak up from the depths, so keep your eyes peeled.

MECHA JELLYFISH

Just when you thought it was safe to go swimming, Mecha Jellyfish remind you it's not.

SURVIVAL GUIDE

Max Health Power-Ups are the most valuable items in the game. They increase VectorMan's supply of health points, allowing our hero to take more punishment.

Shooting downward in the air slows VectorMan's descent and can allow access to new areas.

Hitting the jump button while in a jump launches a boot-blast, which not only extends a jump but also can defeat enemy orbots.

Fight enemies on slopes by crouching under their shots and shooting up at them.

Some walls that appear solid are actually secret doors.

There are many secret areas, point bonuses, bonus games, and special codes that make it easier to get a high score and finish the game. Exploration and experimentation are very important.

Marge and Doorman are equipped with super-resistant face masks that cannot be damaged. But both of these orbots also have a weak spot: you just have to find it!
