Is There a Hero in the House?

Sometime in the future, somewhere not too far from where you live, an amazing adventure takes place....

The Gunstar family has been the protector of the planet Gunstar 9 (G-9) for generations. Professor White Gunstar, in his youth, defeated the robot Golden Silver, a machine that traveled millions of miles to suck G-9 dry of all its resources. Professor White was able to extract the four famous Mystical Gems (the robot's power source), and imprisoned the robot on one of G-9's moons.

But now, years later, a new menace has arisen. Colonel Red, a vicious dictator (and a very bad dresser), found out that the Gunstars knew the location of the Mystical Gems. One day, The Colonel kidnapped the Gunstar twins' older brother Green and used a mind control machine to make Green obey his orders.

With Green's help, Colonel Red has amassed all four Mystical Gems, has turned Gunstar 9's peaceful worker 'droids into deadly menaces, and is now preparing to leave for Gunstar 9's moon to reactivate Golden Silver. As one of the Gunstar twins, you must fight your way past Colonel Red's Empire Army and retrieve the Mystical gems, or Golden Silver, the Destructor will rise again and destroy your world! Are you heroic enough for the task?

Gearing Up for the Battle

After you select a One- or Two-Player game, the equip screen appears. Player One makes choices using the set of options on the left side of the screen, and Player Two (in Two-Player games) selects from the set of options on the right.

First, choose your player. Gunstar Red (the character on the left) can shoot while moving, while Gunstar Blue (on the right) must stop moving to shoot. Try both players to decide which one is the real you. Press the D-Button left or right to highlight one or the other Gunstar twin and press Button A, C or Start to make your selection.

Next, select the type of weapon you want to start with. Highlight a weapon by pressing the D-Button left or right. A short description of the weapon is given by Professor White at the bottom of the screen. When you decide on the weapon you want to use, press Button A, C or Start to select it. For an

explanation on what each weapon does, see Weapons/Items below.

Finally, you need to pick where to start. You can start from any of the four stages. Highlight a Stage by pressing the D-Button left or right, and press Button A, C or Start to enter the Stage.

Weapons/Items

Think carefully about which weapon to use in each situation. You start the game with only one weapon, but as you go along you will also be able to pick up weapons here and there.

If you are carrying two weapons, you will be able to choose which one to use. Choose by pressing Button A – the weapon that isn't flashing is the weapon that is currently in use.

FORCE: This weapon shoots a beam of plasma energy.

LIGHTNING: This weapon fires a stream of electricity.

CHASER: Laser darts seek out and destroy multiple targets.

FIRE: This is a flamethrower, very effective against enemies at close range.

You can only carry two weapons at one time, but any two weapons can be used in combination to make a high-powered weapon. To select the high-powered weapon, press Button A until neither weapon is flashing. Here are the possible combinations:

Force	+	Lightning	= Rapid-fire Lightning
Force	+	Chaser	= Chaser Force Beam
Force	+	Fire	= Exploding Fireball
Force	+	Force	= Double Fireball
Fire	+	Chaser	= Chaser Fireball
Fire	+	Lightning	= Lightning Saber
Fire	+	Fire	= Ultra Flamethrower
Chaser	+	Lightning	= Chaser Lightning
Chaser	+	Chaser	= Star Chaser
Lightning	+	Lightning	= Mega-Bolt

Vitality

Each Gunstar starts with 100 points of vitality, which can be increased whenever a Vitality-Up item is found. Each of these items increases your vitality level by a certain amount, and that increased amount is what you start off with at the beginning of each Stage.

Vitality-Up items can be collected by shooting boxes, machines, robots, electronic ducks, or sometimes you can find them just lying around. Don't let a chance to increase your vitality pass you by! Grab that vitality!

Brothers Unite!

Gameplay in the Two-Player mode is basically the same as the One-Player mode, with the following exceptions:

- If one player is defeated and rejoins the fight, one-half of the remaining Gunstar brother's Vitality is transferred over to him. Keep both brothers' Vitality up... just in case. To rejoin, press Start.
- One Gunstar brother can grab the other and toss him without either brother losing vitality. Practice this valuable fighting technique and bowl over your enemies!

Continuing the Fight/Giving Up

You start the game with a vitality reading of 100, which can increase by picking up Vitality Up items as you fight your way through each area. Once the Vitality meter reads less than 50, your Character Stats begin to flash.

When your vitality level is reduced to zero, the Continue screen appears. Move the Gunstar icon to YES if you want to continue the game, or NO if you want to quit, and press any button to enter your choice. In Two-Player games, if a Gunstar twin's vitality level is reduced to zero, he disappears from the screen. If you want to play again, press Start.

You can continue the game as many times as you want to, so there's no excuse for giving up before you've foiled Colonel Red's plan. None except an army of robots, monsters and various deadly machines...
